

# Beryl

## Beryl

A transparent to semitransparent, cyclo-silicate mineral species. Varieties of beryl are emerald, aquamarine, heliodor or golden beryl, bixbite, goshenite, maxixe, and morganite. Rare spelling: berylline. Sometimes showing chatoyancy and exhibiting star effects.

See Alexandrite Tsarstone collectors guide, Definition of Beryl, <http://www.alexandrite.net/viewpage.html?id=GG-087-00001> (A transparent to semitransparent, cyclo-silicate mineral species.
